PortalPulse

Network progress and execution evidence

Portaldot Hacker House 2026
Node Operations & Tooling

V3 readonly integration and offline evidence review
Probe deployment and live update pending

Operational questions

Node operators

Is this the expected network?
Are best and finalized blocks advancing?
How old is the latest observation?

DApp developers

Did this exact transaction execute?
Has it reached finality?
Does this caller’s stored state match?

PortalPulse keeps each stage and its evidence visible.

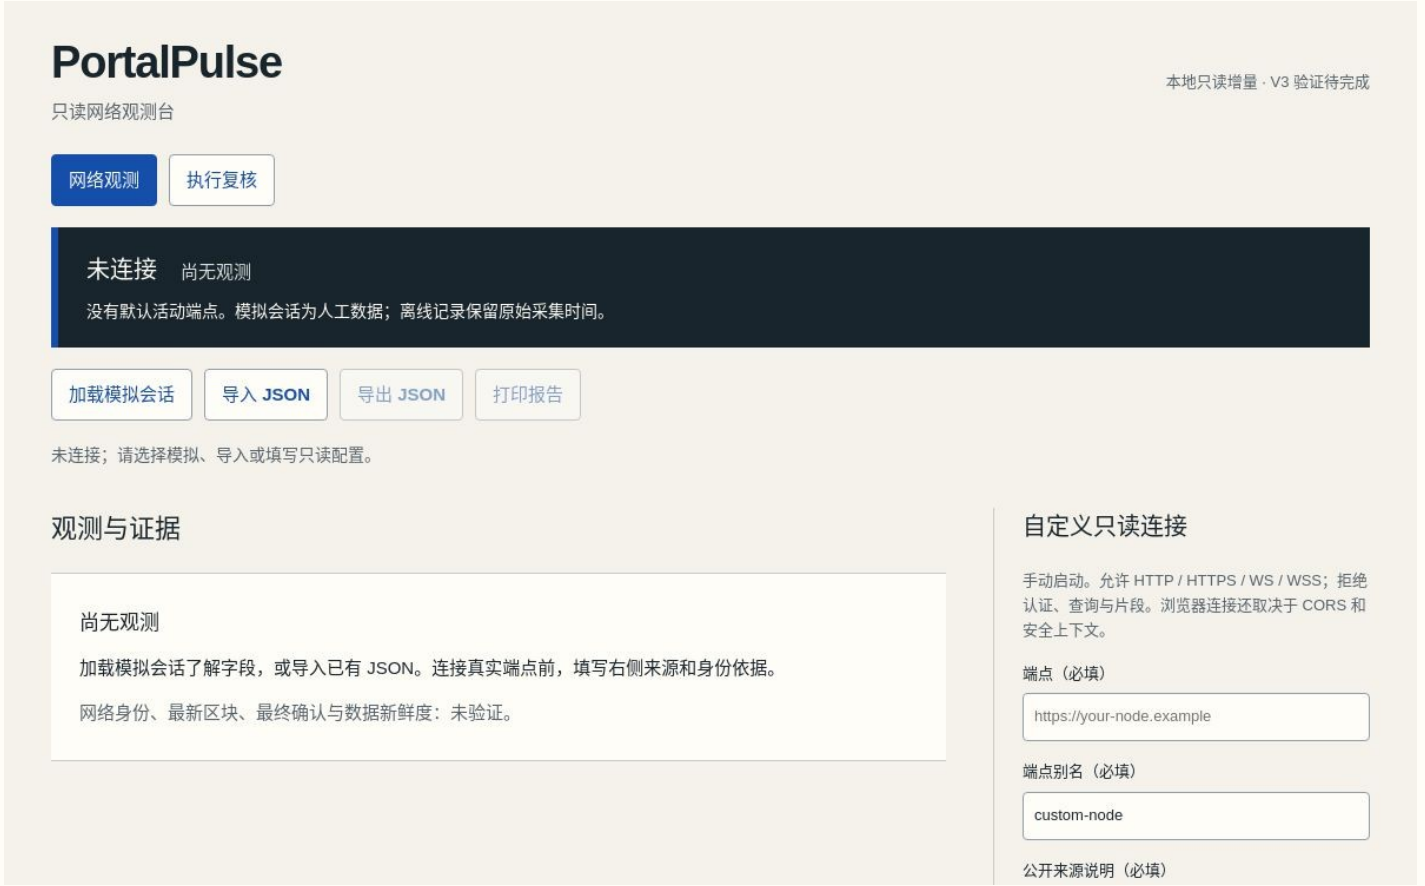

Official V3 observation

4 Nov 2026, 02:08-02:09 UTC

4 samples / 36 successful RPC reads

Best blocks 314148 to 314159
Finalized blocks 314146 to 314157

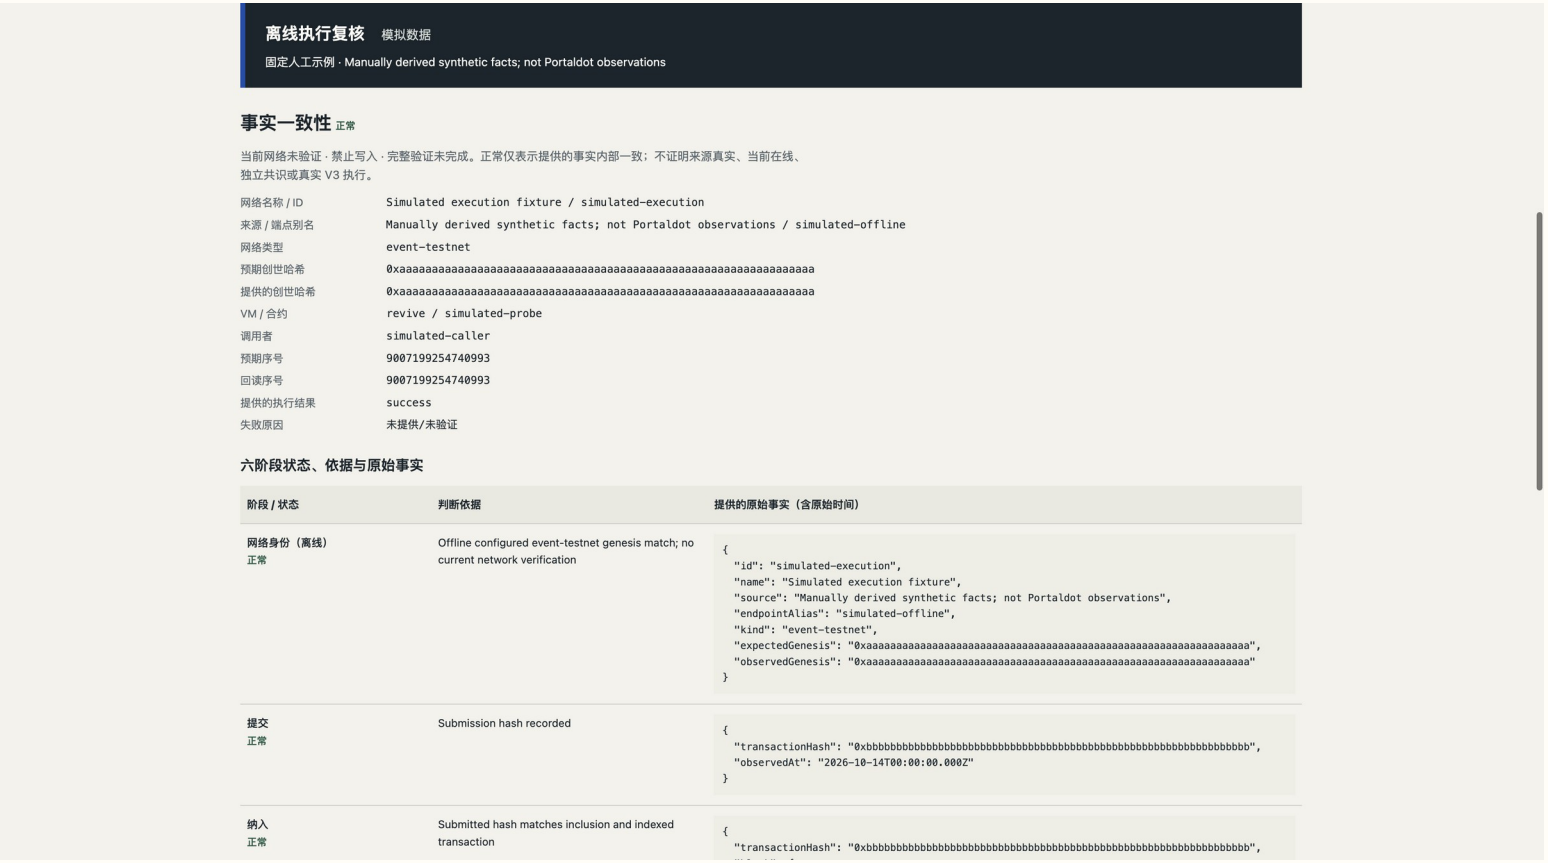

Configured genesis matched
Runtime 3002 / transaction 2

UI capture 16 Oct; CLI observations 4 Nov.

Native collector correlates exact event and caller

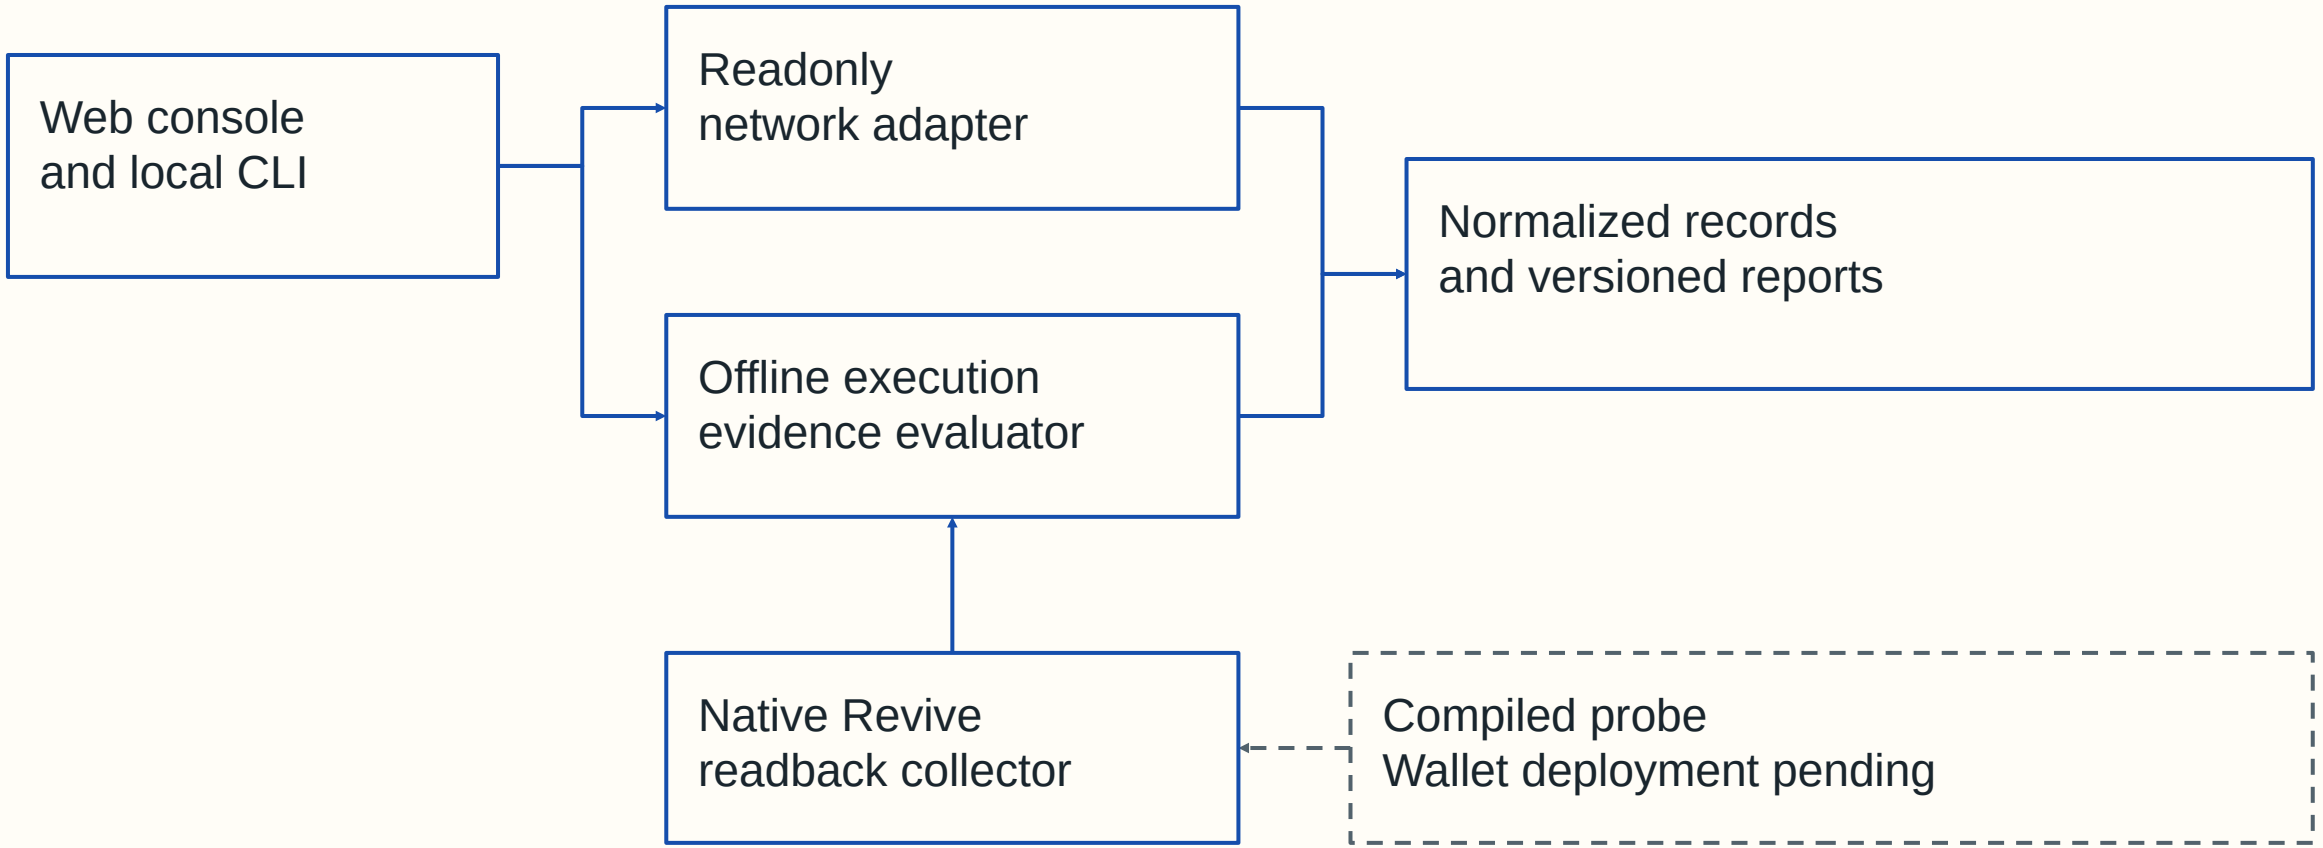

Links native parent headers

Pins EVM code and uint64 state reads to block hashes

Full probe path tested with artificial fixtures

Shared evidence architecture

Solid: implemented read paths Dashed: pending wallet deployment

Evidence available for review

Historical RPC evidence

3 Nov, inclusion block 299780
Finalized head 299784
4 checked parent links
Zero-address code/call returned 0x
Missing block hashes were rejected

Implementation and remaining proof

594 tests passed on 3 Nov
Local probe runtime reproduced
Actual signer and final budget pending
New deployment and update pending
Caller state on real probe pending

Historical report remains unverified; probe intent uses zero-address placeholders.
Offline review: verifiedNetwork=false, writeAllowed=false, fullVerification=false.

Deployment and submission plan

Wallet preparation

Confirm selected account and mapping
Refresh funds and transaction fee
Review finite storage budget
User signs deployment and record
Collect exact finalized probe evidence

solc 0.8.24, Paris, optimizer 200
384-byte creation / 352-byte runtime

Submission and Demo Day

20 Oct Check-in submitted as Build 50050
4 Nov Core target, live writes pending
6 Nov, 12:00 Final submit and code freeze
8-9 Nov UTC Demo Day dates

Final deadline in Asia/Shanghai
Review result and Demo Day slot pending

Portaldot ecosystem contribution

V3 integration and continued support

V3 combines native Revive events with EVM state. PortalPulse keeps their transaction evidence linked.

Support would fund real-probe validation and operator trials.
Hosted monitoring and shared history remain product hypotheses.
