PortalPulse

Network progress and execution evidence

Portaldot Hacker House 2026
Node Operations & Tooling

Readonly and offline prototype
Synthetic demonstration. Recognized V3 deployment pending.

Operational questions

Node operators

Is this the expected network?
Are best and finalized blocks advancing?
How old is the latest observation?

DApp developers

Did this exact transaction execute?
Has it reached finality?
Does this caller’s stored state match?

PortalPulse keeps each stage and its evidence visible.

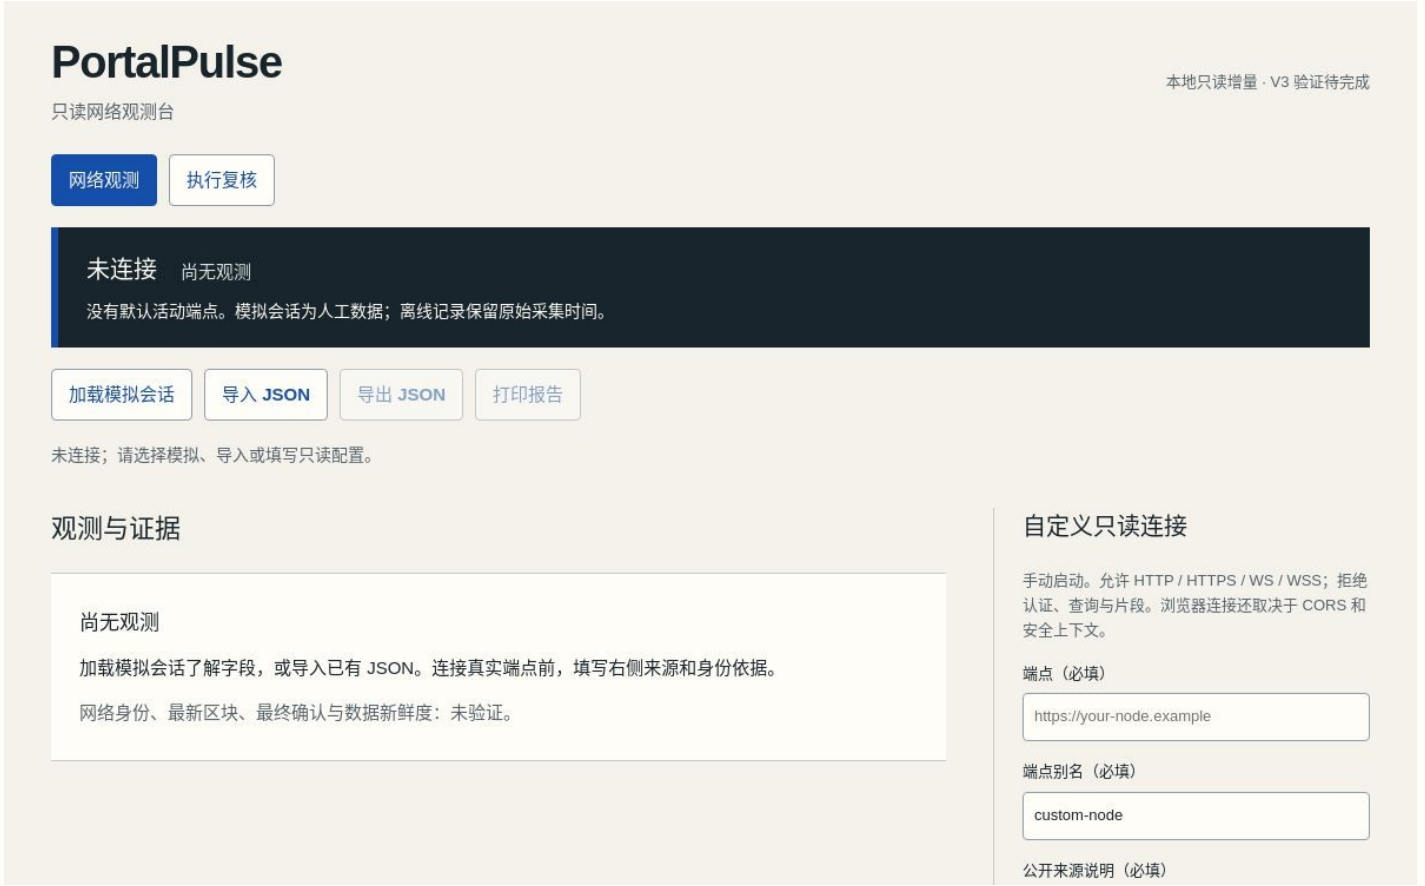

Network observation

1 Start with no default endpoint

2 Load the explicit simulated sample

3 Inspect identity, block progress and collection times

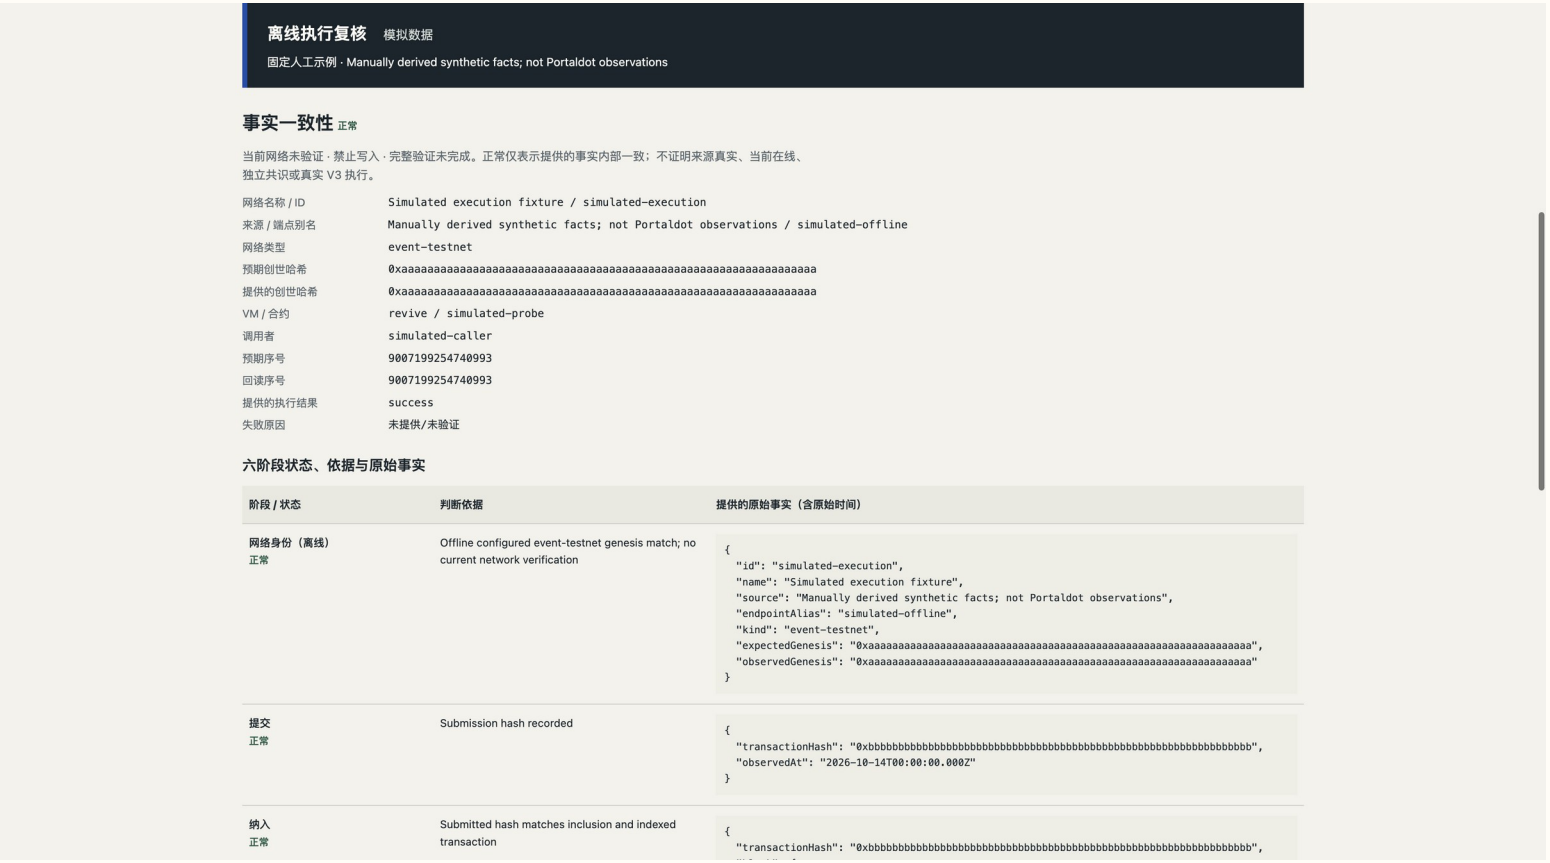

4 Export or import a bounded report

Actual initial view. No live connection or observations.

Offline execution review

Six stages of supplied evidence

离线执行复核 模拟数据

固定人工示例 · Manually derived synthetic facts; not Portaldot observations

事实一致性 正常

当前网络未验证 · 禁止写入 · 完整验证未完成。正常仅表示提供的事实内部一致；不证明来源真实、当前在线、独立共识或真实 V3 执行。

网络名称 / ID	Simulated execution fixture / simulated-execution
来源 / 端点别名	Manually derived synthetic facts; not Portaldot observations / simulated-offline
网络类型	event-testnet
预期创世哈希	0xaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa
提供的创世哈希	0xaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa
VM / 合约	revive / simulated-probe
调用者	simulated-caller
预期序号	9007199254740993
回读序号	9007199254740993
提供的执行结果	success
失败原因	未提供/未验证

六阶段状态、依据与原始事实

阶段 / 状态	判断依据	提供的原始事实（含原始时间）
网络身份（离线） 正常	Offline configured event-testnet genesis match; no current network verification	{ "id": "simulated-execution", "name": "Simulated execution fixture", "source": "Manually derived synthetic facts; not Portaldot observations", "endpointAlias": "simulated-offline", "kind": "event-testnet", "expectedGenesis": "0xaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa", "observedGenesis": "0xaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa" }
提交 正常	Submission hash recorded	{ "transactionHash": "0xbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbb", "observedAt": "2026-10-14T00:00:00.000Z" }
纳入 正常	Submitted hash matches inclusion and indexed transaction	{ "transactionHash": "0xbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbb",

Import raw facts or a report

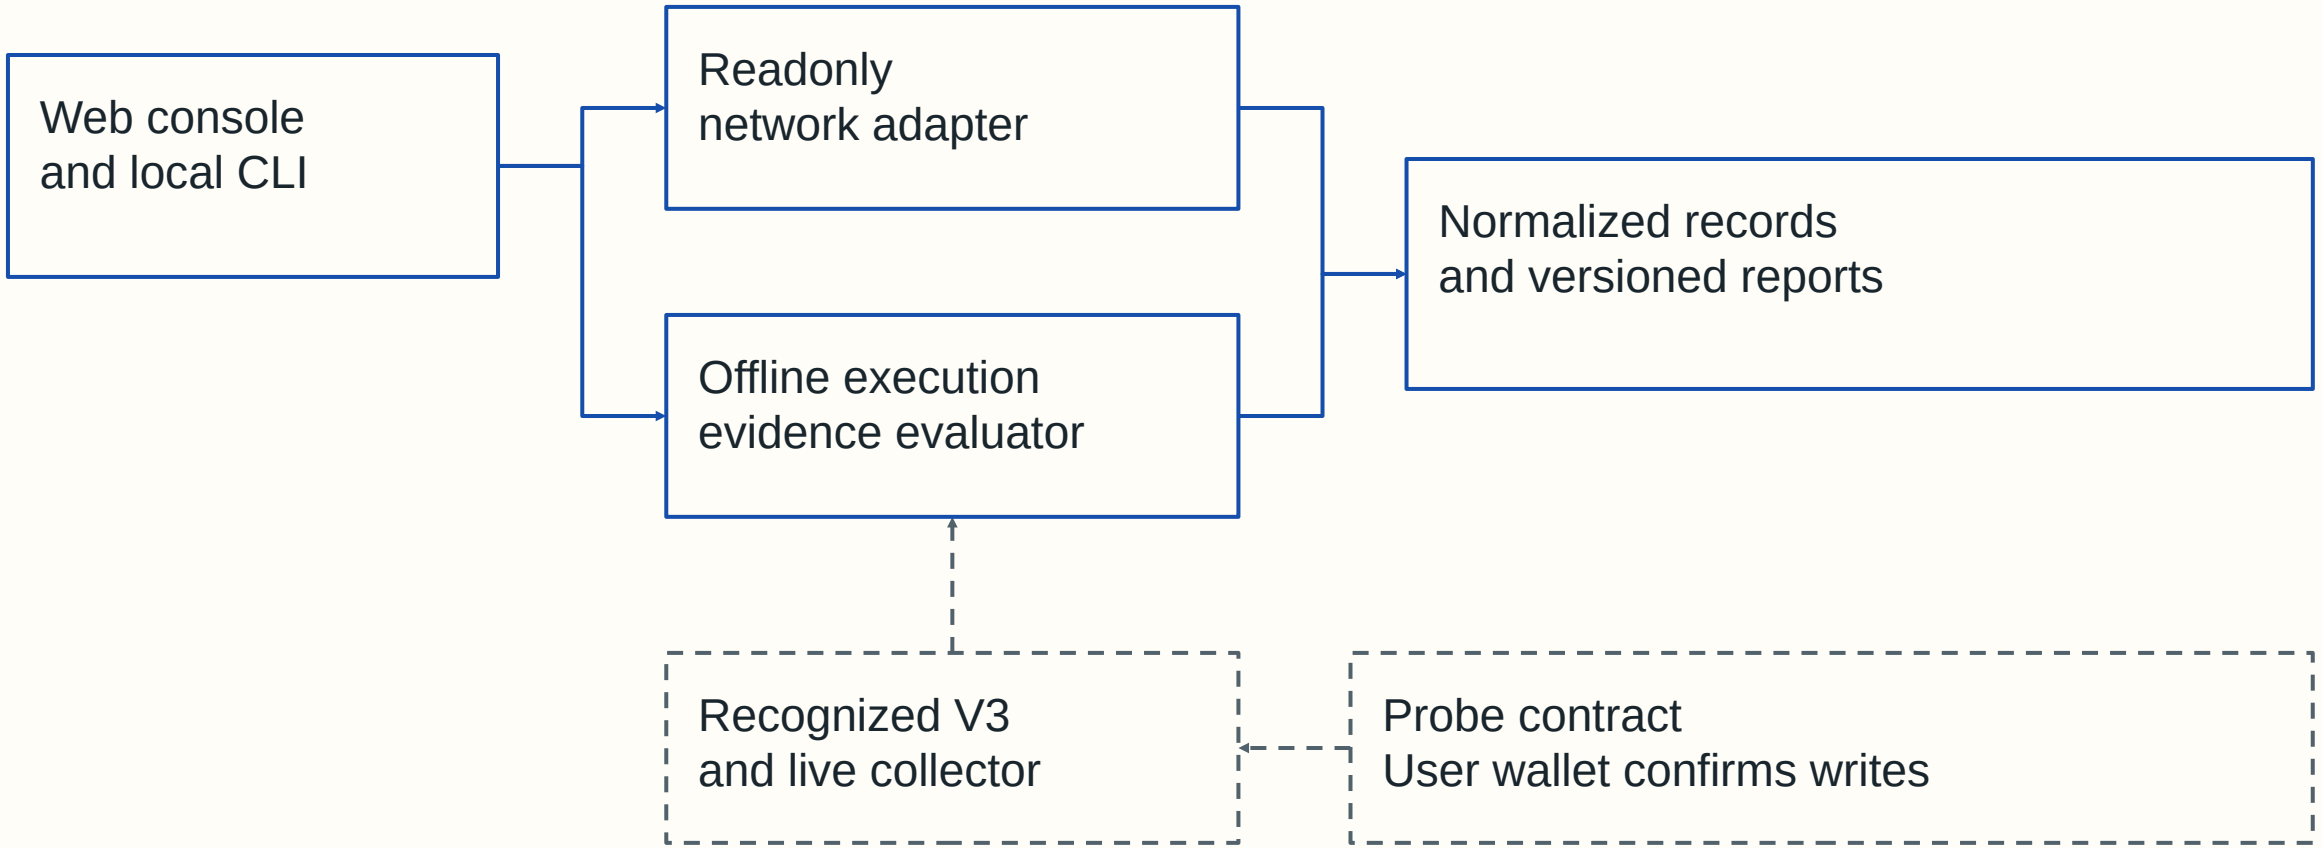

Compare exact transaction, finality ancestry and state

Export and re-import with a SHA-256 check

Missing facts stay unverified.
Failures stay abnormal.

Shared evidence architecture

Solid: current prototype Dashed: pending recognized V3 integration

Current delivery and evidence limits

Available now

Public console and source
Local CLI and portable JSON
Six-stage offline correlation
Strict report integrity checks
Print and pagination accepted

V3 work still pending

Recognized network and runtime
Mapped, funded deployer
Probe address and deployment transaction
Live finality and anchored state readback

Synthetic / offline verifiedNetwork = false writeAllowed = false
fullVerification = false. A digest checks content integrity only.

Portaldot integration and delivery dates

Integration gate

Current organizer configuration
Observed genesis and runtime
Caller mapping and test funds
Then wallet-confirmed probe deployment

Solidity / Revive is a candidate.
Runtime compatibility requires verification.

Delivery plan

Oct 23, 20:00	Internal Check-in target
Oct 24, 20:00	Official Check-in deadline
Nov 4	Core version target
Nov 6, 12:00	Final submission target

All times: Asia/Shanghai
Submission requires platform readback.

Product potential after testnet validation

Hypothesis

Teams may pay for hosted monitoring, longer history and shared operating reports.

Validate repeat usage with node operators and DApp teams.
No customer, revenue or pricing claim at this stage.
